Introduction. The training of domestic horses is traditionally reliant on negative reinforcement to prompt responses, together with positive reinforcement of desired responses and punishment of undesirable ones (McLean, 2005). These practices have changed little since domestication began some 6,000 years ago (Budiansky, 1997; Waran et al., 2002), and although effective, they were not developed ...

Nanocellulose is often being regarded as the next generation renewable reinforcement for the production of high performance biocomposites. This feature article reviews the various nanocellulose reinforced polymer composites reported in literature and discusses the potential of nanocellulose as reinforcement for the production of renewable high performance polymer nanocomposites.
