Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

$F = ma$ . Newton's second law of motion, stated earlier, shows that force is equal to mass multiplied by acceleration, or in shorthand form,  $F = ma$ . To reiterate a point already made, if one assumes that force is constant, then mass and acceleration must have an inverse relationship.

### **Gravity and Gravitation - Real-life applications**

In classical physics and general chemistry, matter is any substance that has mass and takes up space by having volume. All everyday objects that can be touched are ultimately composed of atoms, which are made up of interacting subatomic particles, and in everyday as well as scientific usage, "matter" generally includes atoms and anything made up of them, and any particles (or combination of ...
