Windows 7 Answer File Sample

How do I (recursively) search all file contents in Windows 7? I am using the content:xxx command, in the Search settings box in Windows Explorer, to search xxx in this example. This does not work: As an example of how this search is broken, I see an org.eclipse.wst.common.component file with text that I am searching for and Windows 7 is not returning it in the results.

How do I (recursively) search ALL file contents in Windows ...

A file name extension is a set of characters added to the end of a file name that identifies the file type or format that determines what default program should open it. This will show you how to have Windows 7 hide or show known file type extensions. By default in Windows 7, known file types are set to hide.

File Extensions - Hide or Show - Windows 7 Help Forums

Unfortunately there is no such thing. Windows console applications only have a single output handle. (Well, there are two STDOUT, STDERR but it doesn't matter here) The > redirects the output normally written to the console handle to a file handle.. If you want to have some kind of multiplexing you have to use an external application which you can divert the output to.
