1. Introduction. The space in which employees work is no longer viewed as an incidental context; rather, organizations are exploring ways of using the work environment to support employee performance and well-being [1]. The importance of employees' reactions to the physical environment has been recognized since at least the time of the Hawthorne experiments [2], but the practical and ...

Anaerobic digestion is a collection of processes by which microorganisms break down biodegradable material in the absence of oxygen. The process is used for industrial or domestic purposes to manage waste or to produce fuels. Much of the fermentation used industrially to produce food and drink products, as well as home fermentation, uses anaerobic digestion.

Waste (or wastes) are unwanted or unusable materials. Waste is any substance which is discarded after primary use, or is worthless, defective and of no use. A by-product by contrast is a joint product of relatively minor economic value. A waste product may become a by-product, joint product or resource through an invention that raises a waste product's value above zero.

[1] The relief was framed in the form a declaratory order, but the case put forward by the Appellant in his founding papers was for a review in terms of section 158(1) (h) of the LRA. Section 158(1) of the LRA provides that the Labour Court may review any decision taken or act performed by the State in its capacity as employer, on such grounds as are permissible in law.
