Beginning in Word 2000, Microsoft added two new special characters to Word: the no-width optional break and the no-width non break. These characters were intended for use with some Asian languages, where characters can be placed beside or on top of one another.

What does this nonprinting symbol mean in Microsoft Word?

Combining these two numbers would create this scientific notation equation for $256 - 2.56 \times 10^2$. A negative exponent shows the decimal is moved that many places to the left and a positive exponent shows the decimal is moved that many places to the right.
