Known issues in the current version Development notes The Pale Moon browser, at any point in time, may have a number of known issues. These known issues will usually be addressed in the next release of the browser, or it may be something that people have noticed and are mentioned here because they are "by design", i.e.: issues people have asked about, are known, and are this way on purpose.

Pale Moon - Known Issues

June 2007 saw the official release of what eventually became iOS – concurrently with the first iPhone. iOS did not have an official name until the official release of the iPhone software development kit on March 6, 2008. Before then, Apple marketing simply stated that iPhone ran a version of Mac OS X made specifically for iPhone. When iOS was introduced, it was named iPhone OS.

Note that as of today, CodePlex is now 'read-only' per this blog post. I've been recommending people using CodePlex for DirectX Tool Kit for DirectX 11, DirectXTex, DirectXMesh, and UVAtlas move to using GitHub for some time, but it's now official. The CodePlex archive is expected to stay online as read-only, but with respect to my projects the GitHub version is now the only repo and ...
