The 20% of this that's Agile is the stuff that's relatively easy to change in an organization: putting testers on the teams (except not integration testers evidently), working in iterations, acknowledging that architecture will evolve, and co-opting (occasionally abusing) Agile jargon.

Agile Methodology

There has been lots of talk about the agile mindset, but what does that mean? It does not merely encompass the skills that make a successful agile team member, but also what drives a person to want to be part of an agile team. It should include the quest to learn—even when you fail—and leveraging what you learn to continuously improve on what you do.
