Plant floor design is the key to an efficient production environment. However, when laying out a new plant, changing the layout of an existing facility or adding a new assembly line, many engineers underestimate how many factors to consider. They only focus on equipment or material flow, instead of designing factories around lean principles, such as jidoka, kaizen and kanban.

Agglutination is a linguistic process pertaining to derivational morphology in which complex words are formed by stringing together morphemes without changing them in spelling or phonetics. Languages that use agglutination widely are called agglutinative languages. An example of such a language is Turkish, where for example, the word evlerinizden, or "from your houses", consists of the ...
