Introduction. It is almost certain that problems will occur while drilling a well, even in very carefully planned wells. For example, in areas in which similar drilling practices are used, hole problems may have been reported where no such problems existed previously because formations are nonhomogeneous.

French has many ways a nonnative speaker can mix up verbs or use them incorrectly. The mix-ups are a result of these three problems: These verbs sound like or are spelled similarly to English verbs. An example is *rester*. This verb doesn't mean to rest; it means to stay. (See "Waiting or attending," later in [...])

Five Frequently Mixed-Up French Verbs - dummies

Hard water is water that has high mineral content (in contrast with "soft water"). Hard water is formed when water percolates through deposits of limestone and chalk which are largely made up of calcium and magnesium carbonates.. Hard drinking water may have moderate health benefits, but can pose critical problems in industrial settings, where water hardness is monitored to avoid costly ...
