Students build their own small-scale model roller coasters using pipe insulation and marbles, and then analyze them using physics principles learned in the associated lesson. They examine conversions between kinetic and potential energy and frictional effects to design roller coasters that are completely driven by gravity.

Building Roller Coasters - Activity - TeachEngineering

A particular symptom could be caused by one of several problems, or even by more than one problem at the same time! All of the gizmos we have fix a specific problem. If a symptom could be caused by two things, Murphy's Law says that if you just pick one without taking measurements, the problem will be caused by the other thing, that a different gizmo fixes.
