The word "service" certainly gets some exercise. ITIL v3 says "A service is a means of delivering value to customers by facilitating outcomes customers want to achieve, but without the ownership of specific costs and risks." This impenetrable bit of consultant-babble does not help those who are trying to grasp the fundamental concept.

## **What is a service? | The IT Skeptic**

What if we don't just want low risk for a heart attack, but no risk? One great stumbling block has been that government and national health organizations appear to have taken the patronizing view that the public can't handle the truth and would rather the science be watered down.
