Action Center. There are many ways you can get involved with NEIS and our work to create a nuclear-free world.

NEIS - Illinois' Nuclear Power Watchdog since 1981

Wake-on-LAN (WoL) is an Ethernet or token ring computer networking standard that allows a computer to be turned on or awakened by a network message.. The message is usually sent to the target computer by a program executed on a device connected to the same local area network, such as a smartphone. It is also possible to initiate the message from another network by using subnet directed ...
