We can deploy Office 365 apps (Word, Excel, PowerPoint, Outlook, etc..) to clients using SCCM CB. Beginning from SCCM CB version 1702, from Office 365 Client Management dashboard, you can start the Office 365 application Installer. This will let us configure Office 365 installation settings, download files from Office Content Delivery Networks (CDNs), and deploy the files as an application.

In this part of the code we are determining if Microsoft PowerPoint is open or not. If PowerPoint is already open, we can set a variable equal to the entire program by using GetObject. If PowerPoint is not currently running we can use CreateObject to run an instance of PowerPoint and then set a variable equal to that specific instance of PowerPoint.

#### **Copy & Paste An Excel Range Into PowerPoint With VBA**

Hi, this seems to be working but I think I am doing something wrong with shapes. My pivot table is already existing in excel and I need to copy it and paste to an existing powerpoint file (specific slide).
