5.1.2. Using Lists as Queues¶. It is also possible to use a list as a queue, where the first element added is the first element retrieved (“first-in, first-out”); however, lists are not efficient for this purpose.

5. Data Structures — Python 2.7.16 documentation

Tutorial: Installing Tomcat 7 and Using it with Eclipse. This tutorial covers Tomcat 7, which supports the servlet 3.0 and JSP 2.2 specs. This means that you can also run servlet/JSP or JSF apps that support the latest versions. I recommend Tomcat 7 over Tomcat 6 for all apps, since Tomcat 7 also supports the older servlet 2.5 and JSP 2.1 specs.

Tutorial: Configuring and Using Apache Tomcat 7 with Eclipse

1.2. Reading a CSV file ¶. Unfortunately, it is rare to have just a few data points that you do not mind typing in at the prompt. It is much more common to have a lot of data points with complicated relationships.

Using newlines in sed scripts. Occasionally one wishes to use a new line character in a sed script. Well, this has some subtle issues here. If one wants to search for a new line, one has to use “\n.”

Sed - An Introduction and Tutorial

5.3. Tuples and Sequences¶. We saw that lists and strings have many common properties, such as indexing and slicing operations. They are two examples of sequence data types (see Sequence Types — list, tuple, range). Since Python is an evolving language, other sequence data types may be added.

5. Data Structures — Python 3.7.3 documentation

In this section we look at integrals that involve trig functions. In particular we concentrate integrating products of sines and cosines as well as products of secants and tangents. We will also briefly look at how to modify the work for products of these trig functions for some quotients of trig functions.

Calculus II - Integrals Involving Trig Functions

Zelle's graphics are not a part of the standard Python distribution. For the Python interpreter to find Zelle's module, it must be imported. The first line above makes all the types of object of Zelle's module accessible, as if they were already defined like built-in types str or list.. Look around on your screen, and possibly underneath other windows: There should be a new window labeled ...

2.4. Graphics — Hands-on Python Tutorial for Python 3.1

In this section we introduce the method of undetermined coefficients to find particular solutions to nonhomogeneous differential equation. We work a wide variety of examples illustrating the many guidelines for making the initial guess of the form of the particular solution that is needed for the method.

Differential Equations - Undetermined Coefficients

What is ASP.NET Web API : ASP.NET Web APIs uses HTTP as its communication protocol. Since HTTP is light weight and flexible and it can be used by clients like browsers, mobile devices and even a desktop application.
