We own over 200 heritage listed assets that we actively protect for future generations. We maintain a Heritage and Conservation Register (S170 Register) that lists our assets with state or local heritage significance. Most of the items on our register are also listed in other heritage registers, such as the State Heritage Register which is maintained by the Heritage Council of NSW.

What is the difference between petroleum and petrochemical?

The loss of biodiversity is increasing. There is massive extinction from human activity. For example, fish stocks are dwindling, forest loss is resulting in the loss of many species, land and other resources are being misused, leading to various long terms costs.

Loss of Biodiversity and Extinctions — Global Issues

Project Drawdown is the most comprehensive plan ever proposed to reverse global warming. We gathered a qualified and diverse group of researchers from around the world to identify, research, and model the 100 most substantive, existing solutions to address climate change. What was uncovered is a path forward that can roll back global warming within thirty years.

Summary of Solutions by Overall Rank | Drawdown

The Renewable Energy Sources Act or EEG (German: Erneuerbare-Energien-Gesetz) is a series of German laws that originally provided a feed-in tariff (FIT) scheme to encourage the generation of renewable electricity. The EEG 2014 specified the transition to an auction system for most technologies which has been finished with the current version EEG 2017. ...
