I create UDP packets (insert IP and UDP headers) and send across the UDP socket. I want to add a dummy RTP header to the packet that I create. I created the RTP structure and inserting the RTP head...

RTP Header C Programming - Stack Overflow

netem leverages functionality already built into Linux and userspace utilities to simulate networks. This is actually what Mark's answer refers to, by a different name. The examples on their homepage already show how you can achieve what you've asked for:. Examples Emulating wide area network delays. This is the simplest example, it just adds a fixed amount of delay to all packets going out of ...

tcp - Simulate delayed and dropped packets on Linux ...

This is the only solution that works for VPNs with the client machine being Windows Vista or Windows 7, as other listed answers simply do not function. This answer was previously deleted and should not have been, as this is the only solution for a real-world common case. Since there is no appeal available for the delete, I am reposting it to save others the frustration I had with trying to use ...
