In this video lesson, you will learn the process you need to take to find the perimeter of polygons. You will also learn that there is a shortcut if your polygon is a regular polygon.

Finding the Perimeter of Polygons - Video & Lesson ...

How would I "inflate" a polygon? That is, I want to do something similar to this: The requirement is that the new (inflated) polygon's edges/points are all at the same constant distance from the old (original) polygon's (on the example picture they are not, since then it would have to use arcs for inflated vertices, but let's forget about that for now ;)).

An algorithm for inflating/deflating (offsetting ...

I have detailed US county maps, from the TIGER LINE data sets. How might I sample, smooth, or degrade the data so that I get straighter, more boxy, less "noisy" shapes to represent the geographical features -- in this case just county boundaries and state lines, but maybe also in the general case?

algorithm - How to intelligently degrade or smooth GIS ...

Drag until the spiral is the desired size. Drag the pointer in an arc to rotate the spiral. Click where you want the spiral to begin. In the dialog box, set any of the following options, and click OK.
Radius: Specifies the distance from the center to the outermost point in the spiral.. Decay: Specifies the amount by which each wind of the spiral should decrease relative to the previous wind.
