Myspace Software that ACTUALLY WORKS? I work with a bunch of musicians helping them manage their music pages on myspace. I am looking for a way to auto-approve or auto-accept all their friend requests without having to go through thousands of pages manually. To be clear, I WANT THESE FRIENDS, but I don't to accept them all by hand. On the same note - I know of lots of software out there, but ...

### **Myspace Software that ACTUALLY WORKS? | Yahoo Answers**

Software is a set of instructions, data or programs used to operate computers and execute specific tasks. Opposite of hardware, which describes the physical aspects of a computer, software is a generic term used to refer to applications, scripts and programs that run on a device. Software can be thought of as the variable part of a computer and hardware the invariable part.

### **What is software? - Definition from WhatIs.com**

AnswerWorks lets users get answers to questions phrased in everyday language. Users simply type in questions and AnswerWorks retrieves the most pertinent topics. In a conventional search, the user's query needs to match the exact form of a word to be recognized.

Q&A software uses a sourcing model called crowdsourcing to obtain answers to the questions that are posted. [8] Crowdsourcing is the act of outsourcing work to an undefined, networked labor using an open call for participation [10] , and it is used to support the activities on most Q&A software (such as Stack Exchange , Quora, etc.).

Computer software, or simply software, is a collection of data or computer instructions that tell the computer how to work. This is in contrast to physical hardware, from which the system is built and actually performs the work. In computer science and software engineering, computer software is all information processed by computer systems, programs and data.
