In ethics, value denotes the degree of importance of some thing or action, with the aim of determining what actions are best to do or what way is best to live (normative ethics), or to describe the significance of different actions. Value systems are proscriptive and prescriptive beliefs; they affect ethical behavior of a person or are the basis of their intentional activities.

Absolute Error -- from Wolfram MathWorld

Absolute Convergence. A series is said to converge absolutely if the series converges, where $|a_n|$ denotes the absolute value. If a series is absolutely convergent, then the sum is independent of the order in which terms are summed. Furthermore, if the series is multiplied by another absolutely convergent series, the product series will also converge absolutely.
