ACCOUNTING - University of Washington

Accounting focuses on measuring performance and processing and communicating financial information about economic sectors. It deals with the logical, systematic and accurate selection and recording of financial information and transactions, as well as the compilation, analysis, interpretation and communication of financial statements and managerial reports for use by interested parties.

Grade 10 - 12 Accounting (Basics) | Udemy

Utility, value and transaction. In mental accounting theory, framing means that the way a person subjectively frames a transaction in their mind will determine the utility they receive or expect. This concept is similarly used in prospect theory, and many mental accounting theorists adopt that theory as the value function in their analysis. It is important to note that the value function is ...
