Napier's bones is a manually-operated calculating device created by John Napier of Merchiston, Scotland for calculation of products and quotients of numbers. The method was based on Arab mathematics and the lattice multiplication used by Matrakci Nasuh in the Umdet-ul Hisab and Fibonacci's work in his Liber Abaci. The technique was also called Rabdology. Napier published his version in 1617 in ...

The result is already as simple as it can be, so that is the answer: $8\frac{15}{13} + 1\frac{5}{5} = 8\frac{15}{15}$. Making the Denominators the Same. In the previous example how did we know to cut them into $1/15$ ths to make the denominators the same? We simply multiplied the two denominators together ($3 \times 5 = 15$).
