I'm having a problem. One of my databases on our shared network will not open for any user. It says "Unrecognized Database Format." I've had this problem before but was still able to open the database, compact and repair, or import all of the database objects into a new database.

### **Corrupted Access .accdb file: "Unrecognized Database ...**

Another thing to watch for is when someone has access to READ the fileshare, but cannot WRITE to the directory. It's OK to make the database read-only for someone, but if they ever read it (including using an ODBC connection), it seems like they need to have WRITE permissions for the directory so they can create the lock file.
