

Use The Discriminant To Determine Number Of Solutions

[Download File PDF](#)

Use The Discriminant To Determine Number Of Solutions - Eventually, you will totally discover a additional experience and expertise by spending more cash. nevertheless when? accomplish you believe that you require to acquire those all needs taking into account having significantly cash? Why don't you try to get something basic in the beginning? That's something that will guide you to comprehend even more going on for the globe, experience, some places, like history, amusement, and a lot more?

It is your unquestionably own get older to law reviewing habit. in the course of guides you could enjoy now is use the discriminant to determine number of solutions below.

Use The Discriminant To Determine

Question 48581: use the discriminant to determine the number of solutions of the quadratic equation, and whether the solutions are real or complex. Note: It is not necessary to find the roots; just determine the number and types of solutions. $2x^2 + x - 1 = 0$. $4/3x^2 - 2x + 3/4 = 0$. $2x^2 + 5x + 5 = 0$. $3z^2 + z - 1 = 0$. $m^2 + m + 1 = 0$.

SOLUTION: use the discriminant to determine the number of ...

The discriminant in a quadratic equation is found by the following formula and the discriminant provides critical information regarding the nature of the roots/solutions of any quadratic equation. $\text{discriminant} = b^2 - 4ac$. Example of the discriminant. Quadratic equation = $y = 3x^2 + 9x + 5$; The discriminant = $9^2 - 4 \cdot 3 \cdot 5$

The Discriminant in Quadratic Equations--visual tutorial ...

Note: In a quadratic equation, the discriminant helps tell you how many real solutions a quadratic equation has. In this tutorial, see how to find the discriminant of a quadratic equation and use it to determine the number of solutions!

How Do You Use The Discriminant to Determine the Number of ...

The discriminant of the quadratic equation following $ax^2 + bx + c = 0$ is equal to $b^2 - 4ac$. The notation used for the discriminant is Δ (delta), so we have $\Delta = b^2 - 4ac$. The calculator has a feature which allows the calculation of the discriminant online of quadratic equations.

Calculate discriminant online - Solumaths

The discriminant can be positive, zero, or negative, and this determines how many solutions there are to the given quadratic equation. A positive discriminant indicates that the quadratic has two distinct real number solutions. A discriminant of zero indicates that the quadratic has a repeated real number solution.

Discriminant review (article) | Quadratics | Khan Academy

Whether the discriminant is greater than zero, equal to zero or less than zero can be used to determine if a quadratic equation has no real roots, real and equal roots or real and unequal roots. The discriminant. The discriminant is , which comes from the quadratic formula and we can use this to find the nature of the roots.

Using the discriminant to determine the number of roots ...

Solve $3x^2 + 4x + 2 = 0$. (The relationship between the discriminant (being the value inside the square root), the type of solutions (two distinct solutions, one repeated solution, or no graphable solutions), and the number of x-intercepts on the graph (two, one, or none) is summarized in a chart on the next page .)

The Quadratic Formula: Solutions and the Discriminant ...

Question 769550: use the discriminant to determine the number of points of intersection on the line $y = 3x + 5$ and the quadratic function $f(x) = 3x^2 - 2x - 4$ Solve to find the points of intersection. Found 2 solutions by reviewermath, josgarithmetic:

SOLUTION: use the discriminant to determine the number of ...

This algebra video tutorial explains how to use the discriminant formula on a quadratic equation to determine the number and type of solutions such as real solutions or imaginary solutions.
