Answers from trusted physicians on leukocyte esterase large. First: It suggests but does not confirm the presence of a urinary infection. A culture should be done to confirm and identify a causative bacteria if present.

Leukocyte esterase large - Answers on HealthTap

Unfortunately, about 1 in 5 women are likely to experience a second urinary tract infection. If you've already suffered from one UTI, it's important that you take precaution to prevent getting another urinary tract infection.

UTI Symptoms and Treatment | CareNow®

Urine is the product of the kidneys, which is produced to eliminate the waste products of

metabolism, manage body fluid balance, & maintain acid-base balance. The blood is first filtered by the kidneys, and the composition of the resulting fluid is then altered depending on the body's needs. It is composed of mostly water, and breakdown products from blood cells impart the yellow color (urobilin).
