History of pollution. Although environmental pollution can be caused by natural events such as forest fires and active volcanoes, use of the word pollution generally implies that the contaminants have an anthropogenic source—that is, a source created by human activities. Pollution has accompanied humankind ever since groups of people first congregated and remained for a long time in any one ...

pollution | Definition, History, & Facts | Britannica.com

The impact on water quality by pesticides is associated with the following factors: · Active ingredient in the pesticide formulation. · Contaminants that exist as impurities in the active ingredient. · Additives that are mixed with the active ingredient (wetting agents, diluents or solvents, extenders, adhesives, buffers, preservatives and emulsifiers).

Chapter 4: Pesticides as water pollutants - fao.org

Problem: Pollution. A pollutant is any substance that, when in an environment, poisons our air, land and water. Chemicals have poisoned all of the world, harming humans, wildlife, and plant life, on land, sea and air. Approximately 100,000 synthetic chemicals are now on the market, with one thousand new chemicals are added yearly.

Earth Problems - Pollution - Web of Creation

Mold is a non-scientific term for many types of unwanted fungi found both indoors and outdoors. Active mold growth requires moisture. Actively-growing mold damages the material it lives on, thereby impairing structural integrity. In addition, mold is associated with some untoward health effects in humans, including allergies and infections.

Mold 101: Effects on Human Health - Poison
