Edmund Strother Phelps (born July 26, 1933) is an American economist and the recipient of the 2006 Nobel Memorial Prize in Economic Sciences.. Early in his career, he became known for his research at Yale's Cowles Foundation in the first half of the 1960s on the sources of economic growth. His demonstration of the golden rule savings rate, a concept related to work by John von Neumann, started ...

"Butskellism" was a somewhat satirical term sometimes used in British politics to refer to this consensus, established in the 1950s and associated with the exercise of office as Chancellor of the Exchequer by Rab Butler of the Conservatives and Hugh Gaitskell of Labour. The term was inspired by a leading article in The Economist by Norman Macrae which dramatised the claimed convergence by ...

"This leads us to the how [stet] the equity market determines the 'neutral policy rate'. I have argued in the past that we need to get away from the idea of some magic level of the interest rate that somehow brings inflation to 2% and the economy to full employment.". Eric is even clearer in his tweets in which he asserts that "stock prices determine  $r^*$ ".

6. This brings us to the evolution of one of the two main state variables in our framework, political institutions (the other state variable is the distribution of resources, including distribution of physical and human capital stocks, etc.). Political institutions and the distribution of resources are the state variables in this dynamic system because they typically change relatively slowly ...
