America and methane-to-olefin (MTO) plants in China, although China is also importing an increasing amount of propane from the United States. Bricker explained that there is a growing gap in the supply-versus-demand curve for propylene (see Figure 4-1) as a result of two factors: Steam crackers have been shifting to lighter feedstocks that produce less propylene, and flat demand for gasoline ...

III. America's New Religious Landscape: Three Major Trends The National Decline in White Christian Identity. Demographically, the U.S. historically has been an overwhelmingly white Christian country, with white Protestants alone constituting a clear cultural majority. 6 In 1976, roughly eight in ten (81%) Americans identified as white and identified with a Christian denomination.

Highlights We evaluate regional drivers in agricultural land cover changes in the Italian Alps. We quantify land cover changes during the period 1980–2000. The average loss of agricultural areas was 40%, with a large variability. Forest expansion was higher on the steepest slope class. Loss of open areas is mainly related to abandonment of extensive livestock farms.
