Screening tests are an important part of your preventive health care. The tests can be used for early detection of some of the more common and potentially deadly diseases, such as cancers, diabetes, and heart disease. These tests can find certain illnesses in their earliest and most curable stages, even before you notice symptoms.

Screening Tests for Adults (50 and Up) - Lab Tests Online

Beginning in childhood, the waxy substance called cholesterol and other fatty substances known as lipids start to build up in the arteries, hardening into plaques that narrow the passageway. During adulthood, plaque buildup and resulting health problems occur not only in arteries supplying blood to the heart muscle but in arteries throughout the body (a problem known as atherosclerosis).

Model for Improvement: Plan-Do-Study-Act (PDSA) Cycles Once a team has set an aim, established its membership, and developed measures to determine whether a change leads to an improvement, the next step is to test a change in the real work setting. The Plan-Do-Study-Act (PDSA) cycle is shorthand for testing a change — by planning it, trying it, observing the results, and acting on what is ...
