44 Biomes Answers Biology | SLIDEBLAST.COM

Aquatic biomes include both freshwater and marine environments. There are eight major terrestrial biomes: tropical wet forests, savannas, subtropical deserts, chaparral, temperate grasslands, temperate forests, boreal forests, and Arctic tundra. The same biome can occur in different geographic locations with similar climates.

44.3: Terrestrial Biomes - Biology LibreTexts

Key Points. The climate, including precipitation and temperature, and the geography control the type of biome found in a region. There are two major classifications of biomes, which are terrestrial and aquatic, and these include the types of biomes known as deserts, forests, grasslands, savannas, tundra, and freshwater environments.
