Given our generic arithmetic sequence $a_1, a_2, a_3, a_4, \dots, a_n$, we can look at it as a series: $a_1 + a_2 + a_3 + a_4 + \dots + a_n$. As we can see, the only difference between a sequence and a series is that a sequence is a list of numbers and a series is a sum of numbers.

Background Islamic decoration. Islamic art mostly avoids figurative images to avoid becoming objects of worship. This aniconism in Islamic culture caused artists to explore non-figural art, and created a general aesthetic shift toward mathematically-based decoration. The Islamic geometric patterns derived from simpler designs used in earlier cultures: Greek, Roman, and Sasanian.

The geometric distribution is the only discrete memoryless random distribution. It is a discrete analog of the exponential distribution.. Note that some authors (e.g., Beyer 1987, p. 531; Zwillinger 2003, pp. 630-631) prefer to define the distribution instead for $1, 2, \dots$, while the form of the distribution given above is implemented in the Wolfram Language as `GeometricDistribution[p]`.
