The middle value of 0.21 and 0.22 is 0.215 which as ... The middle value of 0.21 and 0.22 is 0.215 which as a fraction in its simplest form is 43/200

**How do you find a fraction with a value between 0.21 and 0.22**

It's just a matter of defining your 'zero point'. In a real, actual gauge, pressure is measured relative to the atmospheric pressure. If there was 1 atmosphere of pressure inside a container (so it's the same pressure inside the container as it is outside it), the gauge will not read 1 atm, but rather 0 atm, as the pressure inside the container would just be the same as the pressure outside.

**terminology - Gauge pressure vs. absolute pressure ...**

The idea of absolute hot springs from its better-known cousin, absolute zero, which, as you may recall, is 0 K, -273.15° C or -459.67° F. And although abridged definitions of the lowest temperature will frequently state it is the point at which matter stops moving, this is technically incorrect.

**What is the Hottest Temperature Possible?**

In this section we will give a geometric as well as a mathematical definition of absolute value. We will then proceed to solve equations that involve an absolute value. We will also work an example that involved two absolute values.

I was thinking how to get the absolute value of an integer without using `if` statement nor `abs()`. At first I was using shift bits left ( $<<$ ), trying to get negative sign out of the range, then shift bits right back to where it be, but unfortunately it doesn't work for me. Please let me know why it isn't working and other alternatives ways to do it.

**c - get absolute value without using abs function nor if ...**
