Add a new file association in Windows 7 - Stack Overflow

To use another program with the file, you'll just need to start that other program manually first, and then browse your computer for the particular file to open it. For example, you can open Microsoft Word and use its File > Open menu to open a DOC file that is normally associated with OpenOffice Writer, but doing so doesn't actually change the file association for DOC files as explained above.

How to Change File Associations in Windows - Lifewire

The built-in search feature in Windows 7/8/10 is significantly better than the horrible search options in Windows Vista and XP. Instead of installing a third-party program to search for files on inside files on your computer, you can now do it with easily from Windows 7/8/10.
