Table 2 shows that although the oil contents are similar between seed plants and microalgae there are significant variations in the overall biomass productivity and resulting oil yield and biodiesel productivity with a clear advantage for microalgae. In terms of land use, microalgae followed by palm oil biodiesel are clearly advantageous because of their higher biomass productivity and oil yield.

5. Be aware of the free-response booklet instructions. It's helpful to know the actual AP Bio FRQ exam instructions: • Each answer should be written out in paragraph form; outline form is not acceptable. • Do not restate questions or provide more than the number of examples called for. • Diagrams alone will not receive credit, unless called for in the question.
