The eye is an organ that detects light and is the basis of the sense of sight. Its function is to convert light energy into electrical signals that are sent to the brain through the optic nerve.

**Baby eye color calculator - Predict'Eyes**

Teacher note: This can be done numerous ways, by rolling the paper into a tube and balancing the book on top of the tube, or by folding the sheet of paper into various shapes with different cross-sections.

**Thunderbolt Kids**

Cranial nerves are the nerves that emerge directly from the brain (including the brainstem), in contrast to spinal nerves (which emerge from segments of the spinal cord). 10 of the cranial nerves originate in the brainstem. Cranial nerves relay information between the brain and parts of the body, primarily to and from regions of the head and neck.
