Allergies, also known as allergic diseases, are a number of conditions caused by hypersensitivity of the immune system to typically harmless substances in the environment. These diseases include hay fever, food allergies, atopic dermatitis, allergic asthma, and anaphylaxis. Symptoms may include red eyes, an itchy rash, sneezing, a runny nose, shortness of breath, or swelling.

Allergy - Wikipedia

Oxycodone is an opioid medicine that's available only by prescription. When someone takes an opioid, it binds to certain receptors in their central nervous system, altering their perception of pain.

Oxycodone vs. Percocet for Pain | Is Oxycodone Percocet?

There are different stages of alcoholism. When an alcoholic reaches End Stage Alcoholism, they have reached a point that is dramatically different than the initial stages. During the early stages of the disease, the alcoholic drinks heavily, and in between drinking episodes experiences hangovers just as anyone who drinks heavily would expect to experience.

What is End Stage Alcoholism? - The Recovery Village

Benzodiazepines are a class of drugs commonly prescribed to treat anxiety, insomnia, epilepsy, and alcohol dependence. However, benzodiazepines have considerable risks and can be fatal if abused.

Pain and depression are closely related. Depression can cause pain — and pain can cause depression. Sometimes pain and depression create a vicious cycle in which pain worsens symptoms of depression, and then the resulting depression worsens feelings of pain.

Pain and depression: Is there a link? - Mayo Clinic

All benzodiazepines, no matter the strength, can be abused. Even so, high-potency, fast-acting benzodiazepines like Xanax and Ativan may form addictions faster. Find out more information on benzodiazepine drugs and their potential for abuse today.

List Of Benzodiazepines (From Weakest to Strongest)

Trigeminal neuralgia is a nerve disorder that causes a stabbing or electric-shock-like pain in parts of the face. The pain lasts a few seconds to a few minutes, and usually on only one side of the face. It can also cause muscle spasms in the face the same time as the pain. The pain may result from a blood vessel pressing against the trigeminal nerve (the nerve that carries pain, feeling, and ...

1. Introduction 1.1. Pain. Pain is complex phenomena comprising an unpleasant sensory and emotional experience associated with actual or potential tissue damage (Loeser and Treede, 2008), serving a vital protective evolutionary function. Whilst acute pain can be considered adaptive, chronic pain in the absence of injury, following its resolution, or following damage to the nervous system ...

Cranial nerves are the nerves that emerge directly from the brain (including the brainstem), in contrast to spinal nerves (which emerge from segments of the spinal cord). 10 of the cranial nerves originate in the brainstem. Cranial nerves relay information between the brain and parts of the body, primarily to and from regions of the head and neck.
