In a previous part of Lesson 1, work was described as taking place when a force acts upon an object to cause a displacement. When a force acts to cause an object to be displaced, three quantities must be known in order to calculate the work. Those three quantities are force, displacement and the angle between the force and the displacement.

Calculating the Amount of Work Done by Forces

Data for a sample of 25 apartments in a particular neighborhood are provided in the worksheet apartments in the excel workbook apartments.xlsx. using the estimated regression equation found by using size as the predictor variable, find a point estimate for the average monthly rent for apartments having 1,000 square feet of space. place your answer, rounded to the nearest whole dollar, in the ...
