Successfully communicating technical information carries a unique set of challenges. You have to convey complex and highly specialized concepts to audiences that may have only a partial understanding of what you're talking about (or may not understand at all), and these technical concepts can often have dramatic real-world effects.

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...
