Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or ...

A Note for Former HighBeam Users. After many years of successfully serving the needs of our customers, HighBeam Research has been retired. Because HighBeam Research has closed down we have taken you to our sister website Questia, an award-winning Cengage Learning product.

About Questia | Questia, Your Online Research Library

Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...
