### **Accounting: What The Numbers Mean 9e By Marshall solutions ...**

You have it backwards, I believe. If you rearrange the terms in the equation you've written, you get  $0=24$ . Since there are no values of  $x$  such that  $0=24$ , the solution to that equation would be the empty set. The solution to something like " $x+2 = x+2$ " would be the real numbers, because the equation is true for any real value of  $x$ .

Imaginary Numbers are not "Imaginary" Imaginary Numbers were once thought to be impossible, and so they were called "Imaginary" (to make fun of them). But then people researched them more and discovered they were actually useful and important because they filled a gap in mathematics ... but the "imaginary" name has stuck.
