The Industry. While biologists are better known by their specialties, they are united by their study of living organisms. They learn how living organisms work, interact together, and evolve, which allows us to understand our world better, care for ourselves and other living organisms better, and plan for the future.

In biology, regeneration is the process of renewal, restoration, and growth that makes genomes, cells, organisms, and ecosystems resilient to natural fluctuations or events that cause disturbance or damage. Every species is capable of regeneration, from bacteria to humans. Regeneration can either be complete where the new tissue is the same as the lost tissue, or incomplete where after the ...
