1.. IntroductionConstruction is not an environmentally friendly process by nature. A recent study shows that construction is the third largest industry sector in terms of contributions to greenhouse gas emissions in the United States. Construction-related environmental pollution has been increasing in China because of the country's fast-paced urban development since the early 1980s.

A savanna or savannah is a mixed woodland grassland ecosystem characterised by the trees being sufficiently widely spaced so that the canopy does not close. The open canopy allows sufficient light to reach the ground to support an unbroken herbaceous layer consisting primarily of grasses.. Savannas maintain an open canopy despite a high tree density. It is often believed that savannas feature ...
