In this section I lead students in notes concerning dimensional analysis while they fill in their notes and I present the PowerPoint.. While teaching students the steps of dimensional analysis I encourage students to use the method of underlining what they know, circling what they want, determining the equivalence statements, and then plugging in with dimensional analysis.

If you need to develop complex statistical or engineering analyses, you can save steps and time by using the Analysis ToolPak. You provide the data and parameters for each analysis, and the tool uses the appropriate statistical or engineering macro functions to calculate and display the results in an output table.
