The volume of a cube is 36 cubic feet. What is the volume of a pyramid that fits exactly inside the cube? Provide an explanation and proof for your answer to receive full credit.

**The volume of a cube is 36 cubic feet. What is the volume ...**

After working on it for almost two hours and getting 34 of the 36 pegs placed correctly several times, something started to bug me about it. So I cracked out an old math book, and sure enough, the 36-Cube is an example of Euler's "36-officers" problem. The catch is, the 36-officers problem has been proven to be insoluble.
