Through holistic care Scarlet Road offers the hope of freedom to those who have been sexually exploited. We work to intervene and educate in order to prevent victimization, we provide solutions and resources to exit the industry safely, and we journey alongside survivors to find full healing from exploitation.

SCARLET ROAD - Paving the way from sexual exploitation to ...

Biography. A child prodigy, Fefferman entered the University of Maryland at age 14, and had written his first scientific paper by the age of 15. He graduated with degrees in math and physics at 17, and earned his PhD in mathematics three years later from Princeton University, under Elias Stein. Fefferman achieved a full professorship at the University of Chicago at the age of 22, making him the ...

Charles Fefferman - Wikipedia

In mathematics, the Teichmüller space of a (real) topological (or differential) surface, is a space that parametrizes complex structures on up to the action of homeomorphisms that are isotopic to the identity homeomorphism. Each point in (\mathcal{T}) may be regarded as an isomorphism class of "marked" Riemann surfaces, where a "marking" is an isotopy class of homeomorphisms from to itself.

Teichmüller space - Wikipedia

A branch cut is a curve (with ends possibly open, closed, or half-open) in the complex plane across which an analytic multivalued function is discontinuous. For convenience, branch cuts are often taken as lines or line segments. Branch cuts (even those consisting of curves) are also known as cut lines (Arfken 1985, p. 397), slits (Kahan 1987), or branch lines.

Background: Cyberbullying describes bullying using mobile phones and the internet. Most previous studies have focused on the prevalence of text message and email bullying. Methods: Two surveys with pupils aged 11–16 years: (1) 92 pupils from 14 schools, supplemented by focus groups; (2) 533 pupils from 5 schools, to assess the generalisability of findings from the first study, and ...

Cyberbullying: its nature and impact in secondary school ...

Previous research on cyberbullying. Research on cyberbullying is at an early stage. In the UK, Oliver and Candappa (2003) briefly mention text message bullying in students aged 12–13 years; 4% had received nasty text messages, and 2% had received nasty email messages. Balding (2005) gave a health-related questionnaire, with one question on cyberbullying, to pupils aged 10–11 yrs; 1% had ...
