A cryptographic hash function is a special class of hash function that has certain properties which make it suitable for use in cryptography.It is a mathematical algorithm that maps data of arbitrary size to a bit string of a fixed size (a hash) and is designed to be a one-way function, that is, a function which is infeasible to invert. The only way to recreate the input data from an ideal ...

Cryptographic hash function - Wikipedia

In economics, a production function gives the technological relation between quantities of physical inputs and quantities of output of goods. The production function is one of the key concepts of mainstream neoclassical theories, used to define marginal product and to distinguish allocative efficiency, a key focus of economics.One important purpose of the production function is to address ...
