Moment was designed to work both in the browser and in Node.js. All code should work in both of these environments, and all unit tests are run in both of these environments.

Moment.js | Docs

As far as I'm aware there is no built in way in the testing framework for testing which version of the config settings you should be using. I'm using a wrapper class like the one you describe (which I'm sure you already know is simple to write), but mainly so that we can run our websites outside of the dev fabric.
