If you are good in Spring Framework, the chances of getting ...

Spring Interview Questions and Answers - JournalDev
tl;dr: implements Runnable is better. However, the caveat is important. In general, I would recommend using something like Runnable rather than Thread because it allows you to keep your work only loosely coupled with your choice of concurrency. For example, if you use a Runnable and decide later on that this doesn't in fact require it's own Thread, you can just call threadA.run().
