College Algebra - stitz-zeager.com
We cannot say that the equation x = y 2 represents a function because when we input 4 for x, we get two different answers for y (2 and -2). Therefore, this does not satisfy the definition for a function: "the value of the first variable corresponds to one and only one value for the second value".We have more than one value for y. Hopefully with these two examples, you now understand the ...

In this section we will introduce logarithm functions. We give the basic properties and graphs of

logarithm functions. In addition, we discuss how to evaluate some basic logarithms including the use of the change of base formula. We will also discuss the common logarithm, log(x), and the natural logarithm, ln(x).

Algebra - Logarithm Functions
This lesson covers graphing functions by plotting points as well as finding the domain and range of a function after it has been graphed. Graphs are important in giving a visual representation of the correlation between two variables.

Algebra can essentially be considered as doing computations similar to those of arithmetic but with non-numerical mathematical objects. However, until the 19th century, algebra consisted essentially of the theory of equations.For example, the fundamental theorem of algebra belongs to the theory of equations and is not, nowadays, considered as belonging to algebra (in fact, every proof must use ...
