VMware Horizon View 7: Deployment and Installation [Series] ... VMware Guest Customization – Could not parse or process the unattend answer file. February 18, 2016 February 16, 2016 by Daniel.

### VMware Guest Customization - Could not parse or process ...
I created an answer file that tries to write to the disk:partition(0:1) on a brand new Win7 VM in VMWare. I just created a standard HDD in VMWare and did make sure it was using SCSI 0:1. The VM fires up and does see my autounattend.xml file with no problem because the initial install window is skipped right over.

Hi, I am trying to install Windows 10 Pro on a VMWARE virtual machine. I get the fault "The unattend answer file contains an invalid product key ... " I have provided the product key from my Windows 7

### The unattend answer file contains an invalid product key ...
To customize hosts with shared attributes, you can create a host profile in a reference host. To customize individual hosts, you can set up some fields in the host profile to prompt the user for input for each host. After the user has specified the information, the system generates a host-specific answer file and stores it with the Auto Deploy cache and the vCenter Server host object.

### Customizing Hosts with Answer Files - VMware
"The unattend answer file contains an invalid product key. Either remove the invalid key or provide a valid product key in the unattend answer file to proceed with Windows installation." i tried all these solution on the following link but in vain...

### The unattend answer file contains an invalid product key
I am trying to load Fusion on Mac running Snow Leopard. Supplier had given me incorrect product key, and install screen says "The unattended answer file contains an invalid product key. Either remove the invalid key or provide a valid product key in the unattended answer file to proceed with Windows installation".

### Product Key - Windows 7 |VMware Communities

The answer file for Setup is typically called Unattend.xml. Answer files that are created in Windows System Image Manager (Windows SIM) are associated with a particular Windows image. You can therefore validate the settings in the answer file to the settings in the Windows image.

The following procedure describes how to create a new answer file or open an existing answer file by using Windows® System Image Manager (Windows SIM). After you create or open an answer file, you can add settings and packages to it. For more information, see Configure Components and Settings in an Answer File and Add a Package to an Answer File.

### Create or Open an Answer File | Microsoft Docs

A deployment method that has worked since – forever – is the one passing a unattend.xml file to the setup.exe of Windows, by either passing as a parameter to the setup.exe or by setting the unattend.xml file in the Panther folder. (btw, does anyone knows why the panther folder is called the Panther folder, and not "deployment" or so?).

### How to deploy a vm using powercli and unattend.xml file

Either remove the invalid key or provide a valid product key in the unattend answer file to proceed with Windows installation. Cause This issue occurs because the installation media contains an unattended setup file with an embedded product key.
