Using newlines in sed scripts. Occasionally one wishes to use a new line character in a sed script. Well, this has some subtle issues here. If one wants to search for a new line, one has to use "\n."

Sed - An Introduction and Tutorial
The first statement in main sets n to a value of 10. This is the first number in the countdown. Then the while-loop begins: if this value fulfills the condition n>0 (that n is greater than zero), then the block that follows the condition is executed, and repeated for as long as the condition (n>0) remains being true. The whole process of the previous program can be interpreted according to the ...

Note. This tutorial is adapted from an existing convolution arithmetic guide, with an added emphasis on Theano's interface.. Also, note that the signal processing community has a different nomenclature and a well established literature on the topic, but for this tutorial we will stick to the terms used in the machine learning community.
